Email: hi@dirah.sa | WhatsApp: +966 54 421 4495

Website: [7aninalfourati-eng.github.io/hanin-alfurati-portfolio-](https://7aninalfourati-eng.github.io/hanin-alfurati-portfolio/)

Good analysis starts with the decision, not the chart

Specialized in business intelligence, data analytics, and process improvement, with a practical background in project management (PMP®) and operational skills gained across multiple sectors.

How I Work

I turn any data into decision-ready dashboards and reports, using Power BI, advanced Excel, Power Query, Tableau, and Alteryx. I believe a good report starts with understanding the decision it will serve — not with choosing charts — so I combine operational understanding with project-management discipline: a clear scope, declared stages, and deliverables handed over on time.

Who I Serve

- Facilities management & O&M companies
- Hotels & the hospitality sector
- Tourism, Hajj & Umrah companies
- Small and medium enterprises
- HR, finance departments & PMOs

WORK STAGES

How do we start?

1 Request Received

Via the website form or WhatsApp, with a reply within 24 business hours.

2 Free Discovery Call

20 minutes to understand your need and identify the right service or package.

3 Quote & Agreement

Scope, deliverables, timeline, and number of revision rounds, followed by written approval and a deposit.

4 Phased Execution

A draft version is shared for review before final delivery, with regular updates.

5 Delivery & Support

Files delivered with a usage walkthrough, then a post-delivery support period per the package.

HOW WE REACH THIS PRICE

A sum of real work stages, not an arbitrary number

The price of any dashboard or report is not an arbitrary number — it's the sum of real work stages. The table below shows what each price includes, so it's clear what you're paying for.

Work Stage	What It Includes	Basic	Professional	Advanced
Requirements Understanding	A call or meeting to understand the goal and the decision the report will serve	1 hr	1.5 hrs	2 hrs
Data Cleaning	Handling duplicates, gaps, errors, and standardizing formats	2 hrs	3 hrs	5 hrs
Modeling & Relationships	Building correct relationships between tables	1 hr	2 hrs	3 hrs
DAX Measures	Writing and testing performance measures	1 hr	2.5 hrs	4 hrs
Design & Build	Building the screens, visuals, and interactivity	2 hrs	4 hrs	6 hrs
Analysis & Recommendations Report	A written booklet explaining results in non-technical language	1 hr	2 hrs	3 hrs
Communication & Reviews	Responding to feedback and revision rounds	1 hr	2 hrs	3 hrs
Total Hours	—	9 hrs	17 hrs	26 hrs

The analysis booklet in the Basic package is a concise one-page summary (top 3–5 findings), not a full report. An extended analysis report can be requested as an add-on for any package.

Nine services — standalone or combined into one project

Any service can be requested independently or combined into a single project. Prices shown are starting prices; the final price is set in a written quote after understanding the scope of work.

01

Needs Assessment & Requirements Meeting

Duration 90-min session; document delivered within 1–2 business days

You get Requirements document, suggested KPIs, initial mockup, scope & pricing

SAR 400 (fully deducted from the project value if approved within 14 days) — first discovery call free

02

Data Cleaning and Preparation

Duration 2–4 business days

You get Analysis-ready data, documented queries, a data-quality summary

From SAR 400 per dataset (after a free sample review)

03

Data Modeling

Duration 2–4 business days

You get A Star Schema model, relationship diagram, brief documentation

From SAR 500 (up to 6 tables)

04

KPI Design and Performance Tracking

Duration 2–3 business days

You get A ready-to-approve KPI dictionary, an initial KPI-screen mockup

From SAR 400 (up to 8 KPIs)

05

DAX Development and Troubleshooting

Duration 1–3 business days

You get Formatted, commented measures with a simple explanation for each

A dedicated 1-hour session: SAR 150, or a 10-measure bundle: SAR 900

06

Specialized Operational Data Analysis

Duration 4–7 business days

You get An executive summary, a report or analytical dashboard, actionable recommendations

From SAR 1,800 for a one-time analysis (up to 12 months of data)

07

Power BI Dashboard Development

Duration 5–12 business days depending on package

You get An editable PBIX file, a PDF version, a results-explanation booklet

08

Power BI Dashboard Review & Improvement

Duration 1–3 business days

You get A review report classifying findings, with suggested quick fixes

From SAR 1,200 to SAR 4,000 depending on package (launch price)

From SAR 600 per report (improvement quoted separately)

09

Recurring Report Automation

Duration 1–3 business days (one-time setup)

You get A self-updating, self-sending report, an alerts schedule, a one-page runbook

From SAR 700; a custom Power Automate workflow from SAR 1,000

Which package fits you?

Choose the package closest to your need. Anything beyond a package's limits is added from the published add-ons list at a set, published price. Prices below are launch prices for the project's first clients.

Basic

1,200 SAR

One quick dashboard from a tidy Excel file, with a concise results summary

Most Popular

Professional

2,500 SAR

A sound data model, publishing & scheduled refresh, a written analysis report in plain language

Advanced

4,000 SAR

More detailed reports with professional design, a full report with recommendations, a custom mobile layout

Work hours	Up to 6 hrs	Up to 14 hrs	Up to 26 hrs
Response time	Within 48 business hours	Within 24 business hours	Within 24 hours (priority)
Includes	Bug fixes & small edits	Basic + monthly report refresh	Standard + a monthly performance review meeting & KPI development

FREQUENTLY ASKED QUESTIONS

Before You Start

Our data is messy — can you still work with it?

Yes. We start with a free sample review, then cleaning is quoted clearly before any commitment.

Can we edit the dashboard ourselves later?

Yes. Files are delivered in the original, editable Power BI format, with a usage walkthrough.

Our request doesn't quite match the packages?

I'll prepare a custom proposal with scope, timeline, and a written price after the discovery call.

How do we start?

Fill in the service request form on the website or message me on WhatsApp, and we'll schedule the discovery call.

TERMS & CONDITIONS

— Payment

Basic package & standalone services: 50% upfront, 50% before final files are delivered. Professional & Advanced: 40% upfront, 30% on first-draft approval, 30% on delivery. Support packages: paid monthly in advance. Payment by bank transfer.

— Tax

Prices are in Saudi Riyals, excluding VAT (15%) where applicable.

— Quote validity

14 days from its issue date.

— Timeline start

The stated duration begins once the required data and the deposit are received.

— Client responsibilities

Providing the data and necessary access, naming one person responsible for approvals who responds within 3 business days, and consolidating feedback into a single batch per revision round. Delays here extend the delivery timeline accordingly.

— Revision rounds

A round is one consolidated set of feedback on the delivered version, within the agreed scope. Any new addition (a page, source, or KPI) is priced from the add-ons list.

— Confidentiality

Your data is handled with full confidentiality; an NDA can be signed on request. I recommend sharing anonymized data where possible, and data copies are deleted from my devices within 30 days of final delivery unless otherwise agreed.

— Ownership

Ownership of delivered files transfers to the client after payment in full. I retain the right to reference the project in my portfolio after masking sensitive data and with the client's consent.

— Licensing

Sharing dashboards within your organization via Power BI Service requires Pro licenses or Premium/Fabric capacity on the client's own account, per Microsoft's current policy. Delivery as a Power BI file or PDF requires no license.

— Post-delivery support

Covers fixing errors in the delivered work only, and does not include new development.

— Not included

Building data-entry systems or databases, integrating complex ERP systems (quoted separately), hosting, purchasing licenses, and extensive training (except as an add-on).

— **Cancellation**

The deposit is non-refundable once work has begun; the client is billed for work completed up to the cancellation date.
